

Data Engineer with 6+ years of experience in designing and optimizing data pipelines, ETL/ELT workflows, data modeling, and warehousing Azure Databricks (ADB), Snowflake. Skilled in Spark, PySpark, SparkSQL, Python and MySQL with hands-on expertise in Data Lakes, Delta Lake, and Azure. Proficient in building scalable, reliable solutions through CI/CD, cloud migration and performance optimization. Strong background in data governance, data quality, and enabling advanced analytics in cloud environments.

Skills

Programming: Python, MySQL, PySpark, SparkSQL

Cloud Technologies: Azure Databricks, Azure Data Lake Storage, Azure SQL Database, Databricks, Snowflake, Azure Cloud Platform

Other Skills: Data Pipelines, Data Warehousing, Cloud Migration, Performance Optimization

Experience

Data Engineer • Tata Consultancy Services (TCS) • India

Jan 2020 – Present

- Migrated complex Oracle SQL ETL pipelines to scalable, dynamic Databricks notebooks using PySpark, SparkSQL, and Azure Delta Lake for enhanced performance and scalability.
- Achieved 20% infrastructure cost reduction and significant improvements in processing speed, query optimization, and overall data pipeline efficiency.
- Implemented advanced parallelism and optimization techniques in PySpark ETL workflows, transforming lengthy batch processes into highly efficient pipelines running in minutes. Leveraged SparkSQL, Azure Databricks, and distributed computing to improve data processing speed and scalability.
- Spearheaded migration of critical Informatica and ETL workflows to Azure Databricks notebooks, facilitating Teradata to Snowflake cloud migration and significantly improving query performance for a leading insurance provider.
- Designed and implemented scalable data solutions using Medallion architecture in Azure Databricks, efficiently processing and managing over 5 TB of data daily for high-performance analytics.
- Architected and optimized high-performance data workflows using Spark, Python, and Azure DataBricks, reducing processing time by 25% while significantly improving platform scalability and efficiency.

Certifications

Microsoft Certified - Azure Data Fundamentals | Microsoft

Databricks Certified Data Engineer Associate | Databricks

Databricks Certified Data Engineer Professional | Databricks

Google Cloud Certified Generative AI Leader | GENAI

Awards

Received the "Client Champion Award" for exceptional collaboration, reliability dedication, consistently recognized by the client for delivering high-quality project outcomes and exceeding expectations.

Projects

Insurance Claims Data Pipeline Optimization

- Designed and optimized scalable ETL pipelines using Azure Data Databricks, and Spark to process and transform large volumes of insurance claims data, improving data accuracy and reducing processing time by 40%, enabling real-time analytics and actionable business insights.

Education

Central University of Haryana, Haryana India (2016- 2019)

Master of Computer Application (MCA)
